POLARMARINE

Certificate

Hereby we certify the ability of our Electro Tyfon series MT- and MTX – and Air Tyfon series AT- and MKT – and Push Buttons TL80p, TL80B, TL70B, TL70P to work properly in arctic condition.

- The units are maintenance free, there is no any oil for lubrication.
- The gear wheels are greased by special wolfram based grease which can withstand temp. down to -35 deg C without heating.
- The bearings are factory encapsulated with special grease guaranteed to -40 deg C
- In addition the motor is heated continuously (below 0 deg C) and the heating is conected to the gearbox.

Further we have more than 80 years experience in sound signaling equipment and 35 years with Electro Tyfon. Our whistles are used all around the world, many of them in arctic seas with very little number of claims. The Whistles work between -55 C and +60 C.
